ANATOMY AND PHYSIOLOGY
8426.RCOC.Y

Length of course: Yearlong

Grade level: 10-12

Prerequisites or approval required: Successful completion of Biology. Can be concurrently enrolled in Chemistry.

Short description of topics and/or key concepts covered in the course:

This course is an introductory study of human anatomy and physiology. It is recommended for students interested in pursuing a career in a medical field. The course aim is to familiarize students with the major body systems and their interrelationships. Attention will focus on both macroscopic and microscopic anatomy & physiology. Labs involving dissection of preserved organisms as well as physiological self-observation are required.

Assessments to expect per 6-weeks:

1-2 Tests
1-2 Projects
3-4 Labs
5-6 Classwork Assignments

Approximate, average time required for homework, study, and/or practice per week:

1-2 hours of reading, finishing projects, and studying for tests

Summer reading/practice requirements:

None

ANATOMY AND PHYSIOLOGY (weighted)
8426.HCOC.Y

Length of course: Yearlong

Grade level: 10-12

Prerequisites or approval required: Successful completion of Biology. Can be concurrently enrolled in Chemistry.

Short description of topics and/or key concepts covered in the course:

This course is an introductory study of human anatomy and physiology. It is recommended for students interested in pursuing a career in a medical field. The course aim is to familiarize students with the major body systems and their interrelationships. Attention will focus on both macroscopic and microscopic anatomy & physiology. Labs involving dissection of preserved organisms as well as physiological self-observation are required.

Assessments to expect per 6-weeks:

2 Tests
3-4 Quizzes
6-8 Homework Assignments

Approximate, average time required for homework, study, and/or practice per week:

2-3 hours of reading, memorization of anatomical terminology, completion of homework

Summer reading/practice requirements:

None
