COURSE DESCRIPTION:

Welcome to Chemistry! Most people think chemistry is (1) blowing stuff up and/or (2) very difficult. In reality, chemistry is much more than those two ideas. With current science and technology, it is now imperative that students graduate from high school with an understanding of chemicals, safety, and chemical knowledge.

The goal of this course is to instill the student with basic chemical knowledge needed for life, school, and other science classes taken beyond this point. This course is dedicated to students, and **requires scientific curiosity, integrity, and EFFORT!** Students will explore, analyze, and communicate scientific ideas so that they can apply their knowledge in everyday life.

Some grading procedures

“msg” in the gradebook generally indicates that teacher will accept the assignment for late work

Most AHS Math courses have two tests each six weeks

- Students may replace a failing grade on one test by taking the End of Six Weeks exam by coming before/after school during last days of Six Weeks

Biology

- Exit Quizzes – Students may re-take these by coming to FIT or Tutoring
- Exams – Failed exams may be re-taken during the official re-take day
 - One week later are re-take exams in Regular Biology; End of Six Weeks exam for Pre-AP Biology

World Geography has each six weeks...

- Two major grades (exams, projects, or essay) and can be re-taken if failed plus a map quiz

English

- Papers must be uploaded into Blend to prevent plagiarism
- In Pre-AP English the AP style Quizzes can be re-taken, but not the reading checks

How to find teachers' tutoring times
