

Anderson High School has partnered with TESLA in Austin to offer graduating seniors employment opportunities after graduation!

The Tesla Manufacturing Development Program (MDP) provides high school graduates the opportunity to launch a career at Tesla by participating in a paid 7-week Advanced Manufacturing Program at Austin Community College **leading to full-time employment at Tesla.**

Students attend Austin Community College full-time in the summer (as a paid employee of Tesla, tuition-free) and begin a role as a production associate upon completion. To qualify for this program, applicants must be 18 by the start date (summer), enrolled in high school, and on track for high school graduation in 2024.

Potential employees will be required to successfully pass a comprehensive background check.

GREAT PERKS!! Full Benefits | Development Opportunities | Scholarships |

I'm interested! What's next??

We will hold an information session for senior students interested in this program on **Wednesday, January 31st at 10:30 AM in room 133** (during homeroom) Use the QR code to sign up to attend!

Students who choose to apply will attend an interview preparation meeting with Tesla representatives here at Anderson in February where they will learn interview techniques and how to write a resume. They will then have a scheduled interview with Tesla in March (also here at Anderson).

Employment offers will be granted shortly thereafter, followed by celebratory events at the Tesla "Gigafactory" and orientations!

Feel free to contact Cathy Painter in room 131 (catherine.painter@austinisd) with questions.
